### **DETAILED ACTION**

This Office Action is in response to the application which was filed January 25, 2006. Currently, **Claims 1 - 16** are pending.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted:

Group I, Claim 1 – 5 and Claim 6, drawn to a method and a device.

Group II, Claims 7 – 14, Claim 15, and Claim 16, drawn to a method.

In accordance with 37 CFR § 1.475, a national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept (“requirement of unity of invention”). When a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression “special technical features” is defined as meaning those technical features that define the contribution which each claimed invention, considered as a whole, makes over the prior art.

In the instant case, the special technical feature is plasma treating a surface of a die attach adhesive and a semiconductor die.

The inventions of Group I and Group II lack unity of invention because they are not linked by the special technical feature and thereby do not relate to a single general inventive concept under PCT Rule 13.1.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Review of the lack-of-unity-of-invention restriction requirement for this national stage application is provided under 37 CFR 1.143 and 1.144.
